

RAJSEKHAR ACHARYA

Senior Java Backend Developer | Spring Boot | Microservices | Apache Kafka | REST APIs

Phone: +91-8335898602 | Email: rajsekhar.acharya@gmail.com

LinkedIn: <https://linkedin.com/in/rajsekhar-acharya> | GitHub: <https://github.com/rajsekharacharya> | Kolkata, West Bengal, India

PROFESSIONAL SUMMARY

Java Backend Developer with 5 years building and scaling enterprise production systems on Java 17, Spring Boot and microservices. Specialise in REST API design, event-driven architecture with Apache Kafka, Spring Cloud orchestration and OAuth2/JWT security. Led a 6-member Agile team and owned a monolith to microservices migration that cut deployment time by 40% across five production applications.

TECHNICAL SKILLS

Languages: Java (8, 11, 17), SQL

Backend: Spring Boot, Spring MVC, Spring Cloud, Spring Data JPA, Hibernate, REST API Development

Architecture & Messaging: Microservices, Event-Driven Architecture, Apache Kafka (Producer, Consumer Groups), MQTT, Design Patterns

Databases: MySQL, PostgreSQL, Schema Design

Security: Spring Security, OAuth2, JWT, Role-Based Access Control (RBAC)

DevOps & Tools: Docker, GitHub Actions, CI/CD, Maven, Git, Linux, Nginx, Swagger/OpenAPI, JUnit 5, Postman |

Also: Angular, Go, Python

PROFESSIONAL EXPERIENCE

Senior Java Backend Developer

Vareli Tecnac Pvt Ltd | Jan 2022 – Present | Kolkata, India

- Designed REST APIs on Spring Boot, Spring Cloud and Spring Data JPA over MySQL/PostgreSQL — documented with Swagger/OpenAPI, JUnit 5 tested, and secured with Spring Security, OAuth2/JWT and RBAC across all five applications; zero production security incidents.

PPP — Court Booking, Edge Video Capture & Match Analytics Platform [In Development]

Tech: Go, Raspberry Pi, MQTT, Spring Boot, Angular, MySQL, S3/Backblaze B2, FFmpeg, Razorpay

- Built an end-to-end court-booking and match-video platform for pickleball venues: a Go edge agent on Raspberry Pi pulls match footage from the venue's NVR and uploads it to cloud storage; the Spring Boot/Angular backend serves it back to players alongside a live multi-sport scoreboard and a double-entry revenue ledger. Designed to scale to roughly 500 venues (about 5,000 courts).
- Engineered the edge agent's zero-touch enrolment and MQTT/TLS messaging over NAT, a crash-safe job pipeline with resumable S3 uploads and signed Ed25519 OTA updates; fixed a multipart resume-corruption bug, a Razorpay purchase-record gap, and a refresh-token bug causing early logouts.

SMRPS — Smart Raw Material Procurement System [Manufacturing sector client]

Tech: Spring Boot, MySQL, Hibernate/JPA, IoT Weighbridge Integration, Angular, Docker, CI/CD

- Integrated industrial IoT weighbridge hardware with a Spring Boot REST API backend — eliminated 100% of manual data entry and cut procurement processing time by 60%.

Omnichannel Retail Management Platform [Leading retail chain client]

Tech: Java, Spring Boot, Spring Security, MySQL, Angular, REST API Development, Agile

- Delivered a 5+ module retail platform (inventory, billing, procurement, stock) in under 12 months as lead of a 6-member Agile team, with Spring Security-based OAuth2/JWT authentication and role-based permissions.

V-Integrate — Kafka Microservices ERP Migration [Internal]

Tech: Java 11, Spring Boot, Spring Cloud, Apache Kafka, Docker, CI/CD, Microservices

- Decomposed a monolithic ERP into independently deployable Spring Cloud services communicating over Kafka topics — consumer groups handle order, inventory and billing events; deployment time reduced by 40%.

Ranfort Wellness ERP — Full-Stack Developer [Production]

Tech: Spring Boot 3, Java 17, PostgreSQL, Angular 21, Flyway, JWT

- Designed and built a full-stack ERP (Spring Boot 3, Java 17, Angular 21, PostgreSQL) covering marketing, sales, finance and clinical service delivery for a wellness company, with RBAC/JWT security, Razorpay payment reconciliation and Meta/Google Ads spend sync.

EDUCATION

Bachelor of Technology (B.Tech) — Electrical Engineering, Academy of Technology, Hooghly, West Bengal | 2013 – 2017

CERTIFICATIONS & LANGUAGES

- AWS Certified Solutions Architect — Associate (In Progress) | Languages: English (Professional), Bengali (Native), Hindi (Intermediate)
